Introduction

Dear friends and colleagues,

I am very pleased to announce that the national meeting convention " **the new frontier of European health service system. Patient's free circulation through European states, in public and private way**" will take place in **Levico Terme** on the **24th September**.

The event maintains the continuity of the previous meeting in the 2009 relate to the concrete results of the patient's free circulation through European states, especially the different efficiency between public and private health service system.

The meeting convention is the crowning achievement of ten years' research, fruit of the OMTH's intuition. This organization was born in 2000 thanks to the congress' proposal of Levico Terme in October 2005 and May 2009 and Cuntis (ES) in January 2008.

It was a long way that brought an incalculable and important provision for the spas-sector, it allows working out a new and original "model of thermalism" for the beginning of this century.

I want to thank all for the contribution to the conclusion of a so important legislative proceedings measure, members of the European parliament and Institutions, especially the Autonomous Province of Trento.

Here you can find information and the speakers' program.
I hope, I will meet you all during this event!

Ennio Gori
OMTh president

Presentation

The meeting convention "**the new frontier of European health service system. Patient's free circulation through European states, in public and private way**" will take place in **palazzo delle Terme in Levico (Trento)** on the **24th September** and it has been organized by AIOP (Associazione Nazionale Ospedalità Privata) and by Autonomous Province of Trento in collaboration with OMTH (World Hydrothermal Organization), Terme di Levico and the Tourist Board Valsugana Lagorai- Terme - Laghi.

The conference, that takes place every 2 years in Levico Terme, is set in the context of the "**Carta di Levico Terme**" approval. During the convention "**the European healthcare - medical cares for all without borders - prospects of thermal development**" (8th and 9th May 2009), the "Carta di Levico" has been approved and it represents officially the desire to control that European citizens' rights about medical cares are always respected. In fact European citizens have the same health service rights of their mother country when they are abroad, thanks to a community directive approved by the European parliament.

In Levico began, during the world hydrothermal congress 2005, the project to insert the hydrothermal cares in the community directive, between diagnosis and traditional therapeutics also for thermal

treatments. At that time the member of the European parliament, Paolo Costa and Iles Braghetto became appointees to resolve these problems with success and a long intelligent and persistent work. At the time the president of the Autonomous Province of Trento, Lorenzo Dellai played a determinate role for this project because he understood the strategic importance of the thematic and he favoured the contacts with European institutions.

The **directive** about application of patient's sanitary rights abroad has been published on the **U.E. Gazzetta Ufficiale on the 4th April 2011**.

The European members States should insert it in their national legislative measure within 30 months. So it **will be operative in every European State** from **October 2013** and even hydrothermal therapeutics could be done in another country if they are provided in the their national health service.

The long project, began in 2000, is now definitely concluded.

The meeting convention, attached herewith the unabridged program, will be composed of 2 sessions: in the morning and early afternoon there will be some reports and a round table about patient's free circulation through European states, in public and private way and an interesting confrontation about national and international efficiency. In the afternoon and evening the program will treat the European and National hydrothermal situation and its possibilities.

At the convention, that will be introduced by the president of Trentino Alto-Adige and the Autonomous Province of Trento, will take part prestigious conference speakers among them as health service and tourism councillors, councillors of the Autnomonous Province of Trento, national AIOF's president and vice-president, ERMENEIA's president and other health service experts, members of the European parliament, followed the European Directive till its approval and utmost the leading representatives of the hydrothermal sector: the different sessions will be moderated by world renown journalists and international and local press will be present.

Every citizen and health service operator with a request of ECM accrediting will be welcome. The registration is free.

**Carlo Stefanelli AIOF president of the region Trentino
OMTH's Councillor**

NATIONAL CONVENTION
Saturday 24th September 2011
Levico Terme (TN) - Palazzo delle Terme
"The new frontier of European health system"
Patient's free circulation through European states, in public and private way
